

Optimizing your digital enterprise for smart innovation

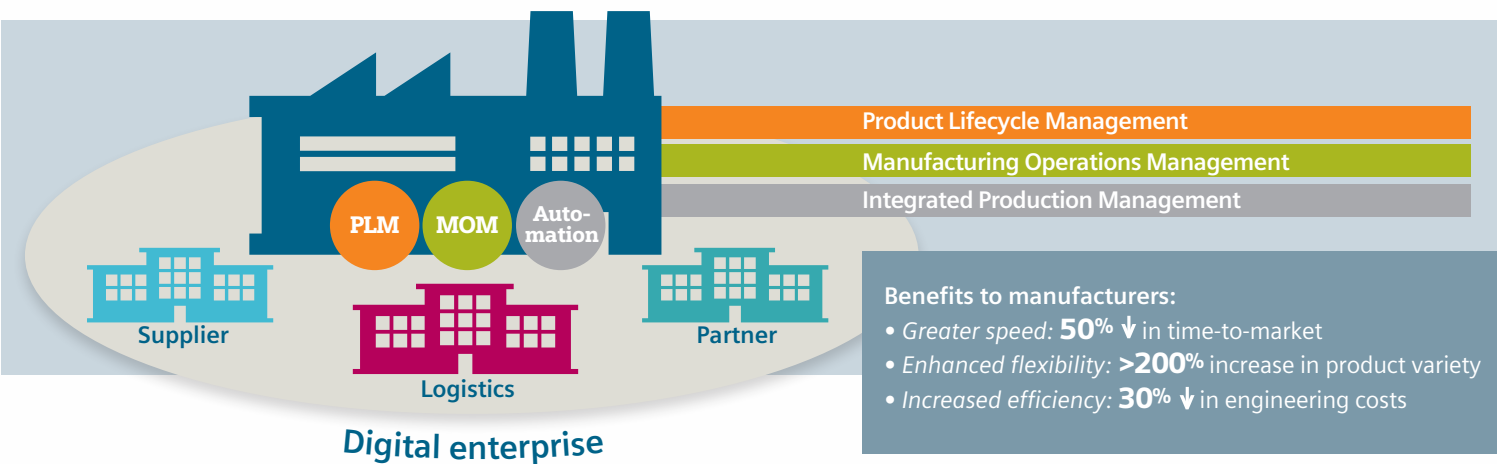

To fully digitalize your business, you must address four key requirements.

<p>Make everyone in the process more efficient Innovation workers spend 31% of the workday searching for information. (Source: IDC, 2013)</p>	<p>Leverage realistic models for more informed decision making Bad data costs organizations as much as 25% of their total revenue. (Source: Data Warehousing Institute)</p>	<p>Integrate virtual development and real production Companies can cut production downtime up to 80% by virtually commissioning machines. (Source: PwC Strategy&, 2014)</p>	<p>Build a system that's readily adaptable to new opportunities Only 36% of companies are able to optimize operations based on Big Data analytics. (Source: Accenture, 2014)</p>

Siemens PLM Software delivers the Smart Innovation Portfolio.
